SALES ANALYSIS OF ECOMMERCE DATA (from Mar-22 to Jun-22)

I/ Overview Amazon Sales

- 1. Sales by month:
- 2. Sales by Category:
- 3. Sales by Size:

II/ Overview Amazon Fulfillment

- 1. Fulfillment by Amazon and Merchant:
- 2. Differences between Amazon and Merchant:

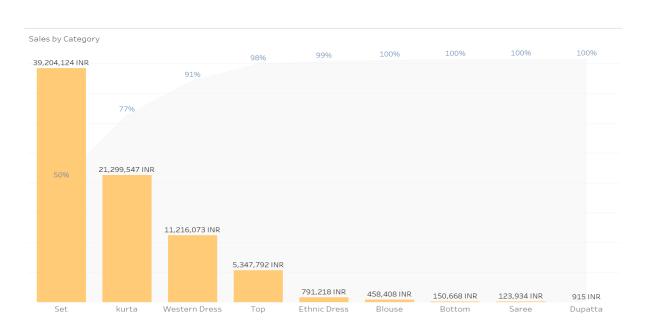

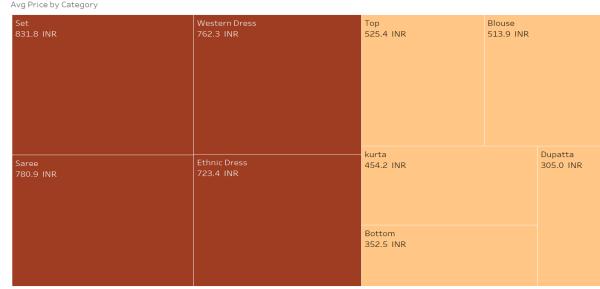

1. Sales by month:

- Sales significantly increased from Mar to Apr (perhaps because Mar was the first launch on Amazon so sales were still low, then in Apr it became popular or the company run many promotions => sales went up).
- However, sales in May dropped slightly by 9% and June's sales dropped by 11%

=>The company needs to find out a way to push sales back, or it can turn out to be a negative trend afterward.

2. Sales by Category:

- The revenue was dominated by the product category "Set," which accounted for 50% of total revenue, followed by kurta with 27% and Western Dress with 14%.

- The top 5 product categories by average price were Set, Saree, Western Dress, Ethnic Dress, and Top, indicating that these products were high-value orders.

2. Sales by Category:

915

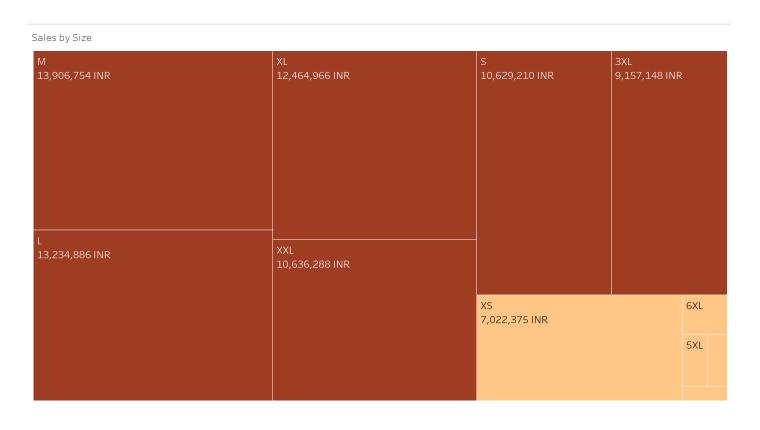

Sales by Category per month

Dupatta

Category 🗜	March	April	May	June
Set	53,884	15,506,676	12,643,698	10,999,866
kurta	34,257	8,017,145	6,660,577	6,587,568
Western Dress	7,653	2,927,781	4,381,304	3,899,334
Тор	4,511	1,821,893	1,995,607	1,525,781
Ethnic Dress	1,099	250,667	293,092	246,360
Blouse	280	195,583	159,795	102,750
Bottom		63,308	50,867	36,493
Saree		55,655	41,537	26,742

- Sales of the top 2 categories went down gradually from Apr to Jun. Other categories (Blouse, Bottom, Saree) followed the same decreasing pattern.
- However, for Western Dress, sales in June were less than May but still higher than in April => Still in growth, try to focus on them
- Top and Ethnic Dress increased sales in May but decreased afterwards.
- It seems like Dupatta is a new category so we also need to take care of them

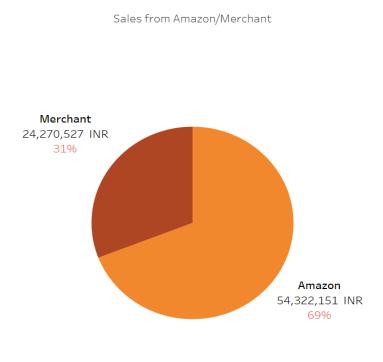

3. Sales by Size:

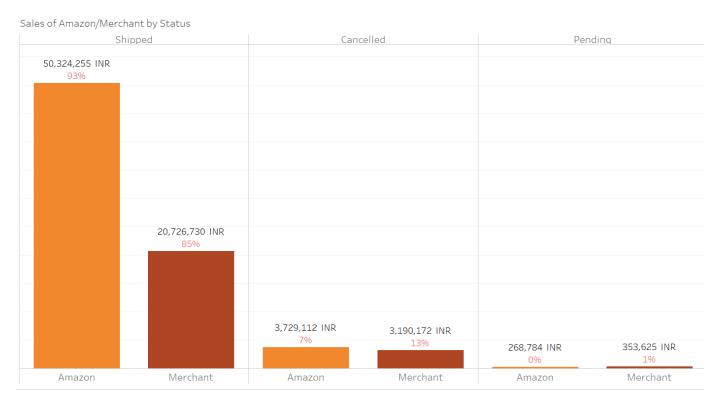

- Customers bought sizes M, L, XL the most, accounting for 51% on sales => ensure enough stock for these sizes
- Following are size XXL, S, 3XL, XS with 10-14% on sales
- => Medium and large size clothes are most in demand.

II/ Overview Amazon Fulfillment

1. Fulfillment by Amazon and Merchant:

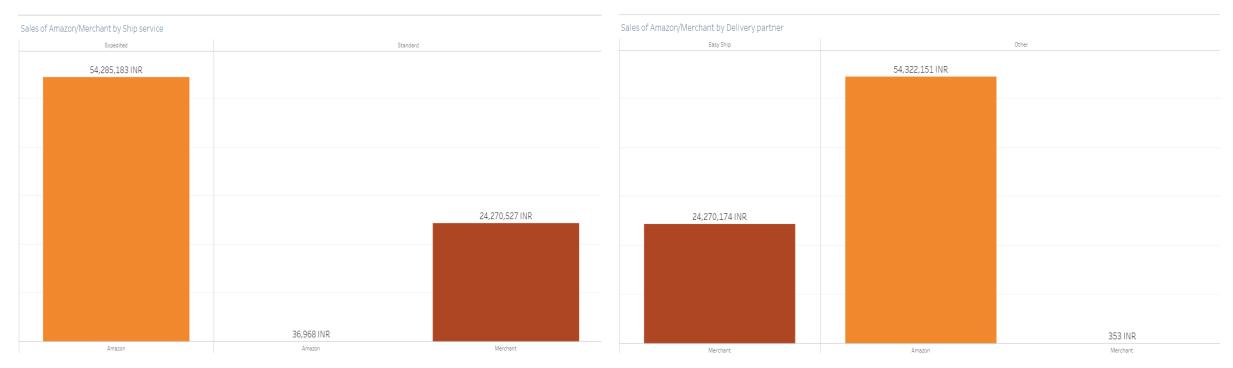

- 69% of sales came from orders fulfilled by Amazon, the rest 31% from Merchant.
- 93% of orders from Amazon were shipped, while only 85% of Merchant orders were shipped.
- Merchant orders had a cancellation rate of 13%, which was higher than Amazon's (only 7% of cancellation rate)

II/ Overview Amazon Fulfillment

2. Differences between Amazon and Merchant

- All Amazon orders were delivered by Other, while Merchant orders were delivered mostly by Easy Ship and only a few by Other.
- Amazon orders mostly were shipped with Expedited and some by Standard service, while Merchant orders only had one Standard service.
- => Expedited ship service & Other delivery partner of Amazon was more effective than Standard service and Easy Ship used by Merchant

III/ Conclusion

The sales trend is going down recently, which requires our company to take prompt action. Some insights we can get from sales analysis:

Customer preference:

- + The top 3 categories we should focus on are Set, kurta and Western Dress.
- + Set and Western Dress are also our high-value order, we might take care of these 2 categories to increase sales amount. Especially for Western Dress, even though general trend of all categories is going down compared to sales in April but this category still maintains higher sales than in previous months, indicating that customers favor this type of clothes.
- + Besides, kurta sell well due to their affordable price, to push sales, we can run promotions to achieve higher quantity sold.
- + Sizes M, L, XL are the most common sizes, these sizes might need more stocks than others to ensure fulfillment for customers.

Fulfillment:

Our sales mostly come from orders fulfilled by Amazon over Merchant. According to analysis, we can see Amazon orders get higher successive delivery rates and lower cancellation rates, thanks to the efficiency of their delivery partner and Expedited ship service. To enhance customer satisfaction, we should use more fulfillment by Amazon.
